

Front End Engineer, Consumer Shopping Experience

Job ID: A2847591 | Location: Bengaluru, Karnataka, IND | Team: Consumer Technology

DESCRIPTION

Amazon is looking for a Front End Engineer to join the Consumer Shopping Experience team, building customer-facing web experiences used by millions of customers every day. You will design and implement responsive, accessible, and high-performance user interfaces, partner closely with product managers and designers, and raise the bar for engineering quality across the org. This role requires strong ownership, the ability to operate in ambiguous situations, and a customer-obsessed approach to building software.

BASIC QUALIFICATIONS

- 3+ years of non-internship professional front-end or full-stack web development experience
- Proficiency in JavaScript (ES6+), HTML5, and CSS3
- Experience building production applications with at least one modern framework (React, Angular, or Vue)
- Bachelor's degree in Computer Science, Engineering, or a related field, or equivalent practical experience
- Experience with version control systems (Git) and code review practices
- Solid understanding of computer science fundamentals: data structures, algorithms, and complexity analysis

PREFERRED QUALIFICATIONS

- Experience with TypeScript in a production codebase
- Experience with state management libraries (Redux, MobX, or equivalent)
- Experience with Node.js for building or consuming backend services
- Familiarity with automated testing frameworks (Jest, Cypress, React Testing Library)
- Experience with CI/CD pipelines and cloud deployment (AWS preferred)
- Working knowledge of web accessibility (WCAG) and performance optimization techniques
- Prior experience mentoring engineers or leading small technical initiatives

AMAZON LEADERSHIP PRINCIPLES

Candidates are expected to demonstrate alignment with Amazon's Leadership Principles, including Customer Obsession, Ownership, Bias for Action, and Deliver Results, through concrete examples from past experience.
